

HEALTH ATTESTATION

I _____ being an official veterinarian authorized by the Veterinary Administration of RSA hereby certify that the animals described overleaf:

1. originate from RSA and are exported to Botswana on temporary basis only and shall return to RSA within seven (7) days of completion the show/competitions;
2. Originate from an area not under veterinary restriction for African Horse Sickness and certified free of Glanders;
3. In the case of mares and / or stallions, also for Dourine, with negative results within 30 days prior to shipment; (date of test) _____
4. Were examined by me 7 days prior to shipment and found to be visibly free of external parasites and communicable diseases to which the species is susceptible.
Date of inspection _____
5. Were immunized against Equine Influenza (EI)* and African Horse Sickness (AHS) ** and that the immunizations are still valid.
 - i. Vaccination dates (EI): **SEE ACCOMPANYING HORSE CERTIFICATES**
 - ii. Vaccination dates (AHS – A & B): **SEE ACCOMPANYING HORSE CERTIFICATES**

* Equine Influenza immunization validity:
Initial vaccination with a bivalent strain vaccine of Equine Flu vaccine, followed by first booster 4-6 weeks later, and then second booster 6 months after, and from there on every 6 months.

* African Horse Sickness immunization is complete and valid if the two doses (A & B) have been administered at least three weeks apart according to manufacturer recommendations and not more than 12 months have passed since the last vaccination.
